

## Data and Internet Services

Reliably connecting your business to the world

As a provider of Enterprise-grade internet services, Broadland Solutions delivers a range of superior internet products to enhance operations.

Whether a small-to-medium sized business or large corporation, accessing the Internet requires a reliable, high performance solution. Broadland Solutions' Enterprise Internet provides a simple, highly available, cost effective, fully managed solution for high speed Internet.

Broadland Solutions' Enterprise Internet Service provides access to the Internet from 2Mbps to 100Mbps using the Broadland Solutions Ethernet Network. Broadland Solutions has partnering arrangements with other International backbone providers to ensure that Internet traffic always reaches its destination as reliably as possible.

## Business Benefits

### BANDWIDTH ON DEMAND

- Speeds from 2Mbps to 100Mbps at your fingertips
- Choose the speed that suits your requirements
- Unlimited upstream and downstream usage

### ENTERPRISE GRADE INTERNET DELIVERED OVER AN ETHERNET NETWORK

- High-speed symmetrical access

### RELIABLE

- High availability saves the costs of downtime

### SECURE

- Peace of mind for your business communications

### FIRST CLASS SERVICE DELIVERY

- Target link availability exceeding 99.95% \*
- Target packet loss less than 0.1%
- Built-in core network redundancy, access network redundancy also available
- Use of multiple Upstream Providers

### COMPREHENSIVE SERVICE LEVEL AGREEMENTS

### ACCESS TO PEERING ARRANGEMENTS AVAILABLE

## ENTERPRISE INTERNET PLAN

The Enterprise Internet Plan is for organisations requiring highspeed links and access to unrestricted downloads.

The Enterprise Internet Plan offers a range of speeds to suit businesses individual requirements where customers can download as much content as required - all for a fixed monthly fee. Fixed monthly fees offer peace of mind as the fixed charge is capped every month.

This plan is ideal when internet usage requirements are for high speed, high average usage, such as streaming of data, large uploads/downloads, web serving, large numbers of users and backup scenarios.

## OPTIONAL SERVICES

### Mail Hosting

Hosted mail services are available as an option to Enterprise Internet customers.

### DNS Hosting

Hosted DNS services, primary and secondary, are available to Enterprise Internet customers.

### Web Hosting

Hosted Web services are available to Enterprise Internet customers.

### IP Addressing

Broadland Solutions typically provides a /30 static IP address range on the Enterprise Internet link to the customer. Any additional subnet ranges will be routed to the IP address allocated to the customer end of the link. These additional IP address ranges are available following request and approval with supporting documentation.

### AntiSpam and AntiVirus

Broadland Solutions can provide a centralised, hosted solution to protect inbound email and provide a filtering service before it reaches your mail server. The service reduces administrative costs and time, reduces email traffic, and removes the demand to always keep your signatures up to date.

### BGP Peering

BGP Peering is available to Enterprise Internet customers who have multiple ISP connections providing router redundancy.

To enquire whether this service is available in your state, please contact your Unified Communications Specialist

## BANDWIDTH ON DEMAND

Select the speeds you need for each site and adjust them as required. Bandwidth speed options are available from 2Mbps up to 100Mbps over a high-speed symmetrical connection.

Any business in today's competitive environment relies more and more on internet applications to communicate. With Broadland Solutions Internet Services, as your organisation grows and your bandwidth requirements increase, you can select the speeds you need for each site and adjust them as required.

## SERVICES AT YOUR FINGERTIPS

**When you connect to the Broadland Solutions network, you connect your organisation to a suite of communication possibilities.**

Every Broadland Solutions connection automatically provides access to a complete suite of communication services, that simply require them to be turned on for your benefit. Your new service will be available almost immediately, bringing these services into your office conveniently and with minimal disruption to your business. Broadland Solutions simplifies the way your network operates, enabling you to improve your network with confidence.
